Rooftop Remedial Waterproofing

The Australian Institute of Management (AIM) recently engaged F.E.W Waterproofing to resurface the Level 6 plant area which was prone to water leakage.

Liquid Rubber was used and is a brilliant seamless product; we were very impressed with the finished product.

The F.E.W workmanship was of a high standard. Since having the Liquid Rubber laid down we have not experienced any water leaks.

Below Ground & Above Ground Waterproofing

Paul is very reliable, trustworthy and an extremely valuable source of knowledge.

I regularly call upon Paul for advice and information not only with waterproofing issues, but also general construction issues which would arise in the normal day to day course of events in our industry.

His friendly and professional approach and attention to detail made a somewhat stressful and potential costly situation become a lot easier to deal with; saving both money and more importantly time.

Remedial Balcony - Waterproofing & Rebuild

Fixing my terrace involved more than providing an effective waterproofing solution. This also involved invasive testing, removal of the existing screed and membrane, installation of new screed, tiling, modified drainage and painting.

F.E.W was able to oversee all aspects of the job. What I also valued was the attention to detail and quality, both technical and finish. This combination meant I was comfortable leaving the work in F.E.W's care while overseas. This sort of reliability and workmanship is hard to find in my experience.

Paul and the F.E.W Team should feel very proud of our job. We got a price for our apartment that exceeded our expectations and the terrace was central to the sales campaign.

I have no hesitation in recommending F.E.W Waterproofing.

Concrete Repairs & Crack Injection Work

Hi Paul,

Thanks for doing such a professional job on our floor this month.

We are REALLY happy with the end result.

Above all, we really valued your professionalism in explaining the solution choices to us, and the professionalism of your staff on-site. Very impressive. We'd have no hesitation whatsoever in recommending you for work.

Regards J. Caruthers Brighton Vic
